

JPA International

OUR ORGANISATION

JPA International is a network of medium sized independent members, of comparable structure sharing:

- the same ambition of high quality and personal service
- the same ethical standards based on our values of professionalism and independence.

Our relationship within the JPA International network allows us to be involved together in the development of technical knowledge, the distribution of software, exchange of experience and to participate in multidisciplinary training programs.

OUR AMBITIONS

Our aim is to participate in the building of a “Business Worldwide”, to develop business between members in various countries and to involve our clients in this process:

- by developing, through regular meetings within the network, European and International know-how, enhanced by our members’ multi-cultural skills.
- by supporting our clients in their international plans, each member in its region or country being a “JPA go-between” for clients of the network willing to export or to set-up a new business outside their own region or country.

OUR VALUES

PROFESSIONALISM

By the sharing of members’ experiences within the network, the involvement in technical operations at a high level with international groups and the organization of training programs for partners and staff, we maintain and develop a high level of professional skills.
